

Carbon Reduction Plan

Supplier name

Infoplus Technologies UK Limited

Publication date

06 JANUARY 2025

Commitment to achieving net zero

Infoplus Technologies UK Limited is committed to achieving net zero emissions by 2040.

Baseline emissions footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions.

Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline year: 2024

Additional details relating to the baseline emissions calculations:

We have not previously reported emissions but have defined the Management System Manual addressing Environmental Aspect Management, Waste Management, Hazard Identification and Risk Assessment, Emergency Management, Control Measures Assessments, Internal and External Audit and Management Review.

Baseline year emissions:

Emissions	Total (tCO ₂ e)
Scope 1	3.90
Scope 2	1.48
Scope 3 (included sources)	32.68
Total emissions	38.06

Current emissions reporting

Reporting year: 2024	
Emissions	TOTAL (tCO ₂ e)
Scope 1	3.90
Scope 2	1.48
Scope 3 (included sources)	32.68
Total emissions	38.06

Emissions reduction targets

To continue our progress to achieving net zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 32 tCO₂e by 2030. This is a reduction of 16%.

Carbon reduction projects

Completed carbon reduction initiatives

The following environmental management measures and projects have been completed or implemented since the 2024 baseline. The measures will be in effect when performing the contract.

- Adoption of auto-switch off LED lighting controls in all our offices
- Changes in travel policy to limit travel only when necessary

Future carbon reduction initiatives

In the future we hope to assess and implement further measures such as:

- Continue the measures started in 2024 (listed above)
- Aim to undertake ISO14001 certification by
- Aim to undertake ISO 14064 certification by 2030
- Switch to green cloud providers and data centres
- Transition to office building providers providing clean energy

Declaration and sign off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹³ and uses the appropriate government emission conversion factors for greenhouse gas company reporting.¹⁴

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements (where required), and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.¹⁵

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the supplier:

A handwritten signature in black ink, appearing to read "S. Smith".
